Discover the Benefits of Radiant Heat
Effective April 2010

Comfort Cove Heating

Black Hills Power's Comfort Cove heating units provide radiant heat, which heats objects directly, rather than heating the air around them. They are placed high on the wall, heating all of the room's objects and maintaining a constant temperature.

Comfort Cove Radiant Heat

Because radiant heat first strikes the floor and whoever is standing on it, the warmth is instantaneous. Comfort Cove's fast response, low-mass aluminum front cover was designed for this purpose.

Safety

By placing Comfort Cove units high on the wall, they are out of reach of children, and the heat is never blocked. Because they operate at a low temperature, the units do not require an overheat switch. Comfort Cove units are UL tested and approved.

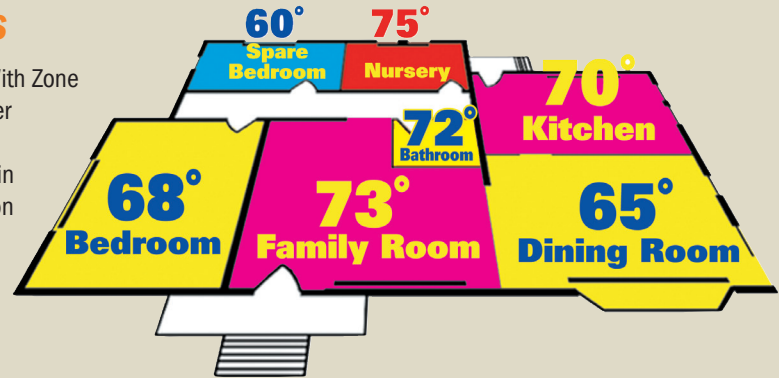

Benefits

Comfort Cove units save floor space. They can be installed over doorways and on interior walls, which are less expensive to wire. Temperature fluctuations are minimal. Their location makes them indestructible, and their smooth surface is easy to clean.

**Cash rebates
are available to
Demand Controller customers.**

Zone Control = Savings

Why pay to heat rooms you're not using? With Zone Control, you can keep the temperature lower in the spare bedroom until you need it. By independently controlling the temperature in each room, you can save over 30 percent on energy costs. In fact, the U.S. Department of Energy says you can save 3 percent on your energy costs every year for every 1 degree you lower your thermostat.

BHP offers free heating and cooling operational comparisons.

THERMOSTATS

| Model # | Description |
|---------|--|
| P-8000 | Honeywell Programmable DPST Line Voltage Programmable Thermostat |
| P-7000 | Honeywell Programmable Line Voltage 40-86 Degree Programmable Thermostat |
| R-101 | Radiant Systems, Inc., SPST 40-85 Degree Wall Mount Thermostat |
| R-102 | Radiant Systems, Inc., DPST 40-85 Degree Wall Mount Thermostat |
| R-201 | Comfort Cove SPST Wall Mount Thermostat for "Limited Use Areas" |
| R-202 | Comfort Cove DPST Wall Mount Thermostat for "Limited Use Areas" |

NOTE: Average homes that have R-19 wall and R-38 ceiling insulation, double-pane windows and standard 8-foot ceiling height require 8 watts of Cove Heat per square foot of living space.

10-Year Limited Manufacturer's Warranty

10-Year Limited Manufacturer's Warranty

Radiant Systems, Inc., the manufacturer of Comfort Cove products, will replace any heating element found to be defective for a period of 10 years from the date of purchase. All other components are warranted for a period of one year from date of purchase. Warranty does not apply to damage from accidents, misuse or alteration, nor where connected to voltage above the nameplate voltage, nor equipment improperly installed, wired or maintained in violation of the instruction manual.
